February 11, 1935.

Mr. E. H. Jeffords,
General Asbestos & Rubber Division,
No. Charleston, S. C.

Dear Jeff:

I am inclosing herewith copy of report entitled "Public Health Reports". This issue contains the Metropolitan Life Insurance Company's study of "Effects Of The Inhalation Of Asbestos Dust On The Lungs Of Asbestos Workers".

If you will refer to Page 4, you will notice it lists Plants A, B. C. D and E. "B" is Charleston, "C" is Manheim and "D" is Bridgeport and Stratford. We believe "A" is Johns-Manville and "E" is Russell, though we are not certain.

This information is taken from a study made during the period of October 1929 to January 1931, and of course, conditions have changed somewhat since that time.

I am sure you will be interested in reading this report.

Yours very truly,

M. F. Judd.
