December 15, 1939.

Albert S. Gray, M.D.,
State of Connecticut,
Department of Health,
Hartford, Conn.

My dear Doctor:

I remember meeting you some time ago at our Bridgeport office and recall that you were interested in dust conditions of our plant from a health standpoint. At that time you discussed the situation with Mr. Simpson and Mr. Judd, who was General Manager. Mr. Judd passed away in July and I was appointed in his place.

We have closed the Bridgeport plant and made considerable improvements. The thought occurred to me that you would like to see the Stratford factory, as we have now consolidated the Bridgeport and Stratford plants. We are now located on East Main Street, corner Ferry Boulevard, Stratford, which is the first street coming from Hartford after you cross Washington Bridge.

I would be very glad to have you visit the plant at any time, with any of your assistants. Advise me a day or two ahead and I will plan to be here and make a tour of the factory with you.

Yours very truly,

THE RAYBESTOS DIVISION OF-
Raybestos-Manhattan, Inc.

By:
General Manager

P.S. — What is the multiple dust counts for the various types of dust?
