Washington, D. C.

Columbia, S. C.
April 15, 1938

Mr. E. H. Jeffords
General Manager
General Asbestos & Rubber Co.
North Charleston, S. C.

Dear Mr. Jeffords:

Enclosed you will find the report of dust study made in the rule spinning department in your plant during the week of April 4, 1938. The results appear to me to be quite gratifying and I heartily indorse the conclusions stated in the report. I hope that this information will meet with your approval and will serve the purpose which you desire.

I should like to say again that it is a great pleasure to work with your men in your plant and I will always be glad to return to be of any further service to you.

Very truly yours,

Robert M. Brown
Chemical Engineer
