Mr. E. H. Jeffords
General Asbestos and Rubber Co.
North Charleston, S. C.

Dear Mr. Jeffords:-

Enclosed herewith is the report of the dust study made in the twisting department of your plant last week. I have compared the figures obtained last week with those from the study made last February and have endeavored to show the improvement which the present system has made. I hope that this report will give you that information you desired when you requested the study. Attached you will find photographs made of your new equipment to supplement those we already have.

It was a pleasure for me to work again in your plant and I wish to express appreciation to you and members of your plant I came in contact with for the courtesy and cooperation shown me. If we can be of any further service to you, please do not hesitate to call upon us.

Very truly yours,

Robert M. Brown
Chemical Engineer
