Mr. E. H. Jeffords, Gen. Mgr.
General Asbestos & Rubber Division
North Charleston, S. C.

My dear "Jeff":

This will acknowledge the report of the South Carolina State Board of Health.

You have made great advances in the dust control and from the reports, we should not have any additional trouble because we are way below any possibility of asbestosis or any other asbestos disease.

I should like to have the report on the Card Room, which I suppose you also have, as no doubt the man made a count in the Card Room.

Very truly yours,

SS:G
