Mr. Manfred Bowditch
Field Director
[illegible] Saranac Laboratory
Saranac Lake, New York

My dear Mr Bowditch:

I was in touch with Dr. Gardner some time before he passed on and he advised me that he was going to finish the asbestos dust experiments that the Laboratory had been carrying along for five years, but we have waited for a year and a half to two years without a report. I hope that you will be in a position to send us a report promptly.

Your correspondence has all been with Vandiver Brown, Secretary of Johns-Manville Corporation, and you will please send the report to him, as all the contributing members are very anxious to get this report, and I can say we are all very much disappointed that it did not come through at least two years ago.

Very truly yours,

SS:G

President
