Re: Asbestos Dust Experiments

My dear Mr. Simpson:

I have noted yours of January 21st regarding the Memorandum of Agreement between the various concerns which are underwriting Dr. Gardner's experiments.

In the meantime I have been doing everything possible to assist Dr. Gardner in getting the experiments under way. I believe we have finally been able to provide him with a type of asbestos fibre dust of a sufficient degree of fineness to meet his requirements. I imagine his experiments are probably under way by this time. He estimates he will need about 1200 pounds of the fibre dust per year and I believe we will be able to provide him with that amount of uniform quality.

Very truly yours,

Vandiver Brown
