ARMSTRONG CORK COMPANY

1. Cork board and cork pipe coverings were manufactured by us and distributed under a number of trade designations, from some time prior to 1940 until approximately 1960. Generally speaking, they were composed of granulated cork, asphalt coated and uncoated.

2. We manufactured LT pipe covering for several years until 1957. This consisted of cork board with an aluminum foil and asbestos paper laminate covering.

3. Under the trade name Temlok we manufactured an asphalt-impregnated insulating fiberboard, beginning prior to 1940.

4. During World War II we manufactured a product known as "Spray-On Insulation." This was a product containing cork with resinous binders, and was used to line tanks and similar military vehicles.

5. Plasticork, a reground baked cork and rubber mixture, was produced during the 1950's.

6. Beginning in 1954, we manufactured Armaflex insulation, a mixture of foamed elastomers, thermoplastic materials, inert fillers, and minor additives.

7. Beginning in 1956 we produced foamed polystyrene board under the trade name Armalite.

8. Beginning some time prior to 1940 and continuing until 1969, we produced insulating firebrick, which was distributed under the trade name Armstrong and others, consisting of fired refractory clay.

9. Beginning in 1960 we produced a variety of insulating materials collectively known as Expandofoam. This trade name refers to a board consisting of expanded polyurethane products, and also the liquid components which are distributed as liquids to fabricators who mix the liquids to produce the expanded polyurethane in a variety of shapes.

10. Beginning about July 1966 and continuing until Dec. 1968, we manufactured a group of products known as Armaspray. This is a binder coated mineral fiber insulating material, containing about 9% asbestos.

11. We manufactured Minalok, a mineral wool fiberboard roof insulation, from 1963 until about 1968.

NAME:

ARMSTRONG CORK COMPANY

PRINCIPLE PLACE OF BUSINESS:

Lancaster, Pennsylvania

PRODUCTS:

Manufactured and Marketed:

1. LT Cork Covering from 1956 - 1960.
2. Armaspray (9% amosite and chrysotile) from July 1966 to July, 1969.

MARKETED:

1. Kaytherm Pipecovering and Block
2. 85% Magnesia Pipecovering and Block
3. Air Cell Pipecovering and Block
4. High Temperature Cement
5. 85% Magnesia Cement
6. #152 Asbestos Cement
7. Amblerex #2 Cement
8. Kaylo Pipecovering and Block
9. Armabestos Pipecovering and Block
10. Armathemp #166
11. K.P. Asbestos Floats
12. High Temperature Pipecovering and Block
13. Bestfelt Pipecovering and Block
14. Duplex Pipe Covering
15. Non-Sweat Pipecovering
16. Non-Frost Pipecovering
17. Armstrong 304 Adhesive Binding

MINED OR MILLED:

No

LOCATION OF MANUFACTURING PLANTS:

Beaver Falls, Pennsylvania; (LT Cork Covering from 1956 to 1959, and Armaspray from July, 1966 to December, 1968).

Published by AsbestosClaims.Law
asbestosclaims.law/library/24218/4

SOURCE OF RAW MATERIALS:

Lake Asbestos of quebec, Ltd.; North American Asbestos Corporation.

REASON FOR DISCONTINUING PRODUCT:

Discontinuation of Supply of Amosite.

FIRST KNOWLEDGE OF HAZARDS:

1968, Through an article appearing in New Yorker Magazine entitled "The Magic Mineral".

FIRST LABELING:

Never Labeled.

SALES:

Has destroyed all records concerining sales to do-defendants and to U.S. Government. Armaspray sold exclusively to A.C. & S. No contract units in California after 1957.

MEMBER OF ATI:

No

WORKERS COMPENSATION CLAIMS:

Manufacturing Employees - None
Contract Unit Employee - 9/17/52 in Massachusetts.

QPL:

Armstrong 304 Adhesive Binding - 1954 - 1968
Insulating Coating Products - 1969 - 1972
