Gentlemen:

This is in response to your April 9 FEDERAL REGISTER announcement revoking all food additive prior status opinion letters and requesting their return for review and reappraisal.

We have received three letters of opinion on status from you since 1956, covering these products and uses:

Date	Chemical	Use
1. July 16, 1956	Butoxy polyoxyethylene polyoxypropylene dimethylpolysiloxane (Silicone X-520)	Anti-seize agent and lubricant on newly blown glass food containers
2. December 6, 1963	Asbestos	Inert filler in paper and paperboard
3. May 12, 1969	Dibutyltin dilaurate	Catalyst to promote curing of polyurethane resins cleared under § 121.2522

Copies of our original requests to you along with our supporting data and your replies, are enclosed for your review.

In the opinion of our toxicologists these chemicals are safe for the sanctioned uses and their continued use offers no hazard to the public. On

asbestosclaims.law/library/15305/1

the basis of this we are continuing to sell these chemicals for these uses, pending your reaffirmation of their status.

Very truly yours,

M.B.VerNooy
