Dear John:

Please refer to your letter of October 8, 1980 concerning the new EPA and DOT regulations on the transportation of hazardous substances.

Abestos ore or finished product has not been identified by the DOT as a hazardous substance, nor are they specified in the EPA regulations. It is possible that this may change in the future as other materials are added to the EPA listing.

Please let me know if you have any questions.

Very truly yours,

Tom Alexander
