Calidria asbestos

UNION CARBIDE CORPORATION • METALS DIVISION • P. O. BOX 579 • NIAGARA FALLS, N.Y. 14302 • TEL: 716-278-3376

September 10, 1979

To: Distributors

Dear

This letter is to urge you to initiate a program (if you do not already have one) to inform your customers of the possible hazards associated with the use and handling of asbestos. A copy of the enclosed letter and attachments, which Union Carbide uses for this purpose, should have been received by you recently.

We suggest that you distribute a similar type of notification to all your Union Carbide asbestos customers on a regular basis so that they will be able to use "Calidria" without any undue health risks. We plan a mailing of this type roughly once a year. It would also be advisable to send a similar notice to new customers on, or before, their first purchase.

Such a program evidences your concern for the safe and proper use of "Calidria" and it makes good business sense. It is demonstrable evidence that you have provided product safety information in the event that a question of product liability arises in the future. You may wish to consult your own attorney in this regard prior to making any such mailings in order to be fully advised of your obligation to give adequate warnings as to those products which you sell or distribute.

Please let me know if you have any questions. I will be glad to work with you in developing an appropriate system of customer notification.

Very truly yours,

R. E. Byrne, Jr.
