San Jose, Calif. 95125

Dear Mr. Sorenson:

Thank you for your interest in our cytology and sputum cytologies. I had hoped that you would also send the information as to the cost and any information you may have on the usefulness of cytology of sputums as they are related to asbestos workers. Do you have information as to the usefulness in using sputum cytology for predictability of future problems. I am aware that it is not a required medical test at this time and certainly the company is reluctant to begin if they do not know what to do with the results of this cytology. Representatives of the company have asked me to write to you for the above information and prices for the service.

Sincerely yours,

Duane F. Hyde, M.D.

Dear Doctor Hyde:

It was a pleasure meeting you during my recent visit to your clinic. Your kind hospitality was appreciated.

As per your request, please find enclosed the OSHA regulations pertaining to asbestos workers. Although sputum cytology is not yet a required medical test for these workers. I understand that updated regulations may include sputum testing. In the meantime, the cessation of cigarette smoking by asbestos workers may significantly lower their high degree of risk to develop lung cancer.

It pleases us to be given an opportunity to demonstrate the quality of our Pap smear and sputum cytology services for your clinic. We are confident of doing a good job for you.

Kindest regards,

Kent Wm. Sorensen
