Address	9921 Brecksville Rd. Brecksville, OH 44141	Dr. P.J. George, Gp Ldr. R.A. Wharton, P.A.
Mfrs. of	Rubber Products	

PLAINTIFF'S EXHIBIT
UC-305

OBJECTIVE:

Determine status of RG-600 evaluation.

DISCUSSION:

George had received samples and literature on RG-600 several months ago. Their main interest was to reinforce mixtures of Bisphenol A epoxies and carboxy terminated butadiene liquid elastomers. They achieved good increases in modulus, but both tensile strength and elongation were greatly reduced. Since this is rather typical of any cheap filler, they lost interest in RG-600.

We discussed a possible 2nd generation RG-600 with a coupling agent more suited to elastomers. They were interested and we promised to keep them advised.
