PLAINTIFF'S EXHIBIT UC-316

PERSONS INTERVIEWED:

Larry Friedsam - Technical Director

CALL OBJECTIVE:

Call made on RG-244 sampled prospect.

RESULTS OF CALL:

Larry was in a clean up run as he is set to go on vacation next week. Diamond has always seemed to have a lot of people in motion but never getting anything done. Our 244 sample is still being shelf life tested even though they have finally broken the ice and got a maintenance line started. If and when it gets evaluated the opponent is Baker's Thixcin but it may be awhile as Diamond is the type of account that requires a lot of in person hand holding and follow up. No X or asbestos is presently used as they have strictly been a trade sales house in the past. The asbestos brought up the reg topic which was briefly discussed due to the time limitations Larry had today.

FOLLOW-UP ACTION REQUIRED:

JW - Stop in on next Houston trip to see where Larry is at on evaluating 244 in their primers.
