- ☐ Health & OSHA Information Blue Book
- ☐ Dust Count Report
- ☐ Other, specify below

PERSONS INTERVIEWED:

Bill Gambler Technical Director

CALL OBJECTIVE:

Call made on HPO prospect manufacturing caulks & sealants.

RESULTS OF CALL:

Vin-Lox manufactures a wide line of acrylic based caulks and sealants for the construction industry. They do have some filler in them but it is mostly limestone Bill said. Canadian asbestos was used in the past also Gambler advised but when the negative publicity flared at its height they found it more practical to formulate it out. The reformulation wasn't too difficult Gambler said as they first went to talc and then a higher solids acrylic which led them into limestone as a talc replacement. Discussed HPO and left our TIB's with Bill in the event they should change their minds re the asbestos health question or run into a problem that only asbestos can solve for them.
