PERSONS INTERVIEWED: Alan Denniston, PhD, Research Chemist
Josefina Dumdum, Research Chemist

CALL OBJECTIVE:

Initial call to determine potential market for RG-244. Call made with Phil Peterson, H&C.

RESULTS OF CALL:

Very concerned about OSHA requirements. No dry asbestos used in plant although one grease formulation is supplied containing asbestos. This is probably supplied by South West Grease as S. W. Grease custom blends about 150,000,000 #/yr. of various greases for oil companies and others on a specialty basis. Plans are made to visit with South West Grease in January, 1982. They have samples of RG-244 and have been called on by D & F Distributing.
