1. UCC is considering divestment of the Calidria Asbestos business and will plan to do so if a financially attractive and otherwise suitable offer is received. The business will continue to be actively conducted by UCC and it is anticipated that, in the event the business is sold, the purchaser will follow the pattern set by UCC.

2. UCC's decision to consider an offer for the Calidria Asbestos business is made on the bases that:

    a. UCC is aiming to concentrate its newer program efforts in areas more directly served by UCC's special expertise and technology. Although the Calidria Asbestos business has an attractive financial future, it is not as closely related to UCC's basic skills as are many of its other programs.

    b. The Calidria Asbestos business is a clearly defined, separate activity of UCC and thus represents a well structured divestment opportunity. This is not true of some businesses, which form a part of a large plant or operational complex.

    c. UCC's Calidria Asbestos assets, consisting of plant, mineral reserve, patents and customers, are tangible and of significant value. UCC thus believes that a good return can be realized from sale of this business.

3. UCC fully intends to continue prosecuting the Calidria Asbestos business activity and will provide a continuing supply of material to all customers during this period.

Comments on Calidria Presentation

1. Set up subsidiary.

2. Make it real - direct control of sales.
   "Real" overhead figures.

3. Operate vigorously.

4. Price on a curve, i.e.

   Value as of 1969 Jan.
   1970 Jan.

5. Potential exists not to get out of the business in 1969.

Need a decision as to how to go.

(a) Requires write-up of rate inflation.

(b) Review by O.C.I
