"UCC COUNTERPART"

UNION CARBIDE CORPORATION
METALS DIVISION
270 PARK AVENUE, NEW YORK, N. Y. 10017

F. J. SHORTSLEEVE
VICE PRESIDENT-PRODUCT GENERAL MANAGER

July 18, 1979

Bemis Company, Inc.
1777 Borel Place
San Mateo, California 94402

Att: A.H. Silvermail
Accounts Manager

Dear Mr. Silvermail:

Asbestos has been classified by the U.S. Department of Transportation, Materials Transportation Bureau as an ORM-C (Other Regulated Material, Group C). Effective August 20, 1979 asbestos packaging must carry ORM-C markings to meet specified Department of Transportation requirements.

Both plastic and multiwall paper bags which Bemis Company, Inc. sells to Union Carbide Corporation will not meet the sift proof requirements for packaging of asbestos. Therefore, as of August 20, 1979 these bags will be used only under the following conditions:

(a) Bags must be transported in closed freight containers, motor vehicles or rail cars that are loaded by and for the exclusive use of the Consignor and unloaded by the Consignee, or

(b) Individual bags must be made dust and sift proof by some method such as shrink wrapping. Such dust and sift proof packagings must be palletized and unitized by methods such as shrink wrapping or wrapping in fiberboard secured by strapping.
