UNION CARBIDE CORPORATION
P.O. Box 579 Niagara Falls, N.Y. 14302

By J. E. Walsh

Date 4/24/73

Full Name	Stanley Furniture Division of Mead Corporation	Interviewed
Address	Ferrum, Virginia	Lynn Crawford - Plant Manager
Mfrs. of	Cast Furniture Parts	

Call made on RG-244 casting prospect following up a lead from Carl Lane of Marco Chemical.

Crawford advised that they are now in the process of revising all of their formulations and Marco is sending a squad down next week to help them with the reformulations. Having read the "Safe Use of 244" brochure that Carl Lane had left with him, the toxicology issue in Crawford's mind was no longer a deterent to using our material. After a brief discussion on toxicology to clarify some questions Crawford still had, he stated as far as he was concerned he would use 244 if it was all both Marco and we said it was. Apparently, they do little, if any, lab work and Crawford said our best bet was to get together with Marco and advise them he would use it and possibly include it in a trial run in the reformulation work they would be doing next week.

JEW

Phone Carl Lane and let him know that Crawford will give us a try and see if it is at all possible to get in with their project here next week.
