SPECIAL INSTRUCTIONS:
Supplied by their Kankakee, Ill. plant.

COMMENTS: 8-19-74 Dust count run with Ed Kleber and data on samples taken and results will be handled by Ed. Asked Tony what they were going to do about the Pacific EX 2 & 3 they use because it is no longer available, but he advised they had about 160M lbs. which would take them 2 yrs. or so to work off. No test work has been done on replacing the 7R Asbestos Corp. of America material.
