Mr. K. P. Karsten
Aluminum Company of America
Alcoa Center, PA 15069

Dear Karl:

Thank you for the time you spent with Gordon Dickson and me last week discussing "Calidria" asbestos products.

We were especially interested in the work you have done with RG-244 in thixotropic fibrated aluminized asphalt roof coatings. As we mentioned at the time, we are anxious to promote the use of RG-244 in this application. To that end, we would appreciate receiving copies of your formulations and recommendations.

In using this information for product literature handouts, we could use actual brand names subject to your approval.

Thank you again for your time and your cooperation.

Very truly yours,

Robert E. Byrne, Jr.
Asst. Marketing Manager
