UNION CARBIDE

Mr. J. L. Myers

June 30, 1975

Messrs. R. E. Byrne
R. F. X. Fusaro
H. B. Rhodes

In order to provide a reasonable protection against product liability suits, Fusaro has suggested that we send to each of our customers a covering letter and enough copies of the soon to be revised Materials Safety Data sheet and the booklet "What you Should Know About Asbestos and Health" for distribution to each of his employees who may be exposed to airborne concentrations of asbestos.

Your comments on this proposal are requested.

W. C. Thurber
