Answering letter date

Subject TSCA Inquiries

The attached letter has been approved by all concerned to answer inquires from customers concerning the registration of our products under EPA's Toxic Substances Control Act (TSCA or TOSCA).

You can use the letter as is, but I'd recommend revising it to fit the product being questioned by the customer. There doesn't seem to be any point in mentioning T-135, RG-600 or silane-treated.

You should sign the letters you send and always include a copy for C. R. Allenbach and the NF "permanent" file.

John L. Myers

Dear Sir:

Union Carbide Corporation is responding to all requirements of the Toxic Substances Control Act (TSCA). The products sold by the "Calidria" Asbestos Group are listed in the EPA Initial Inventory or its supplements.

All "Calidria" products except those listed below are classified as asbestos fiber with a registry number of 1332-21-4:

1. RG-244 is a mixture of asbestos fibers and silica with registry numbers of 1332-21-4 and 7631-86-9, respectively.

2. T-135 is a mixture of asbestos fibers and titania with registry numbers 1332-21-4 and 13463-67-7, respectively.

3. RG-600 is a compound with a registry number of 69278-68-8.

4. Silane-treated asbestos is a compound with a registry number of 68526-78-3.

Please contact me if you have any further questions.

Very truly yours,

A20757
