SUBJECT Asbestos Exposure

FROM J. L. Christensen

Industrial Hygene has reported to RO Spencer that the handling of asbestos gaskets and packing by Stores Personel is at a high level of exposure. To overcome this exposure action must be taken to reduce ~~the~~ open handling of asbestos.

The following recommendation & suggestions have been made.

EWP 1. Seal all gaskets in a plastic envelope including Flexitalic, 515 code No. Series 28416, 28472, 28424

EWP 2. Obtain asbestos rope in small packages to avoid Stores attendant being required to cut-Ref Codes 28786-020 & 022 & 290

DJH 3. Vacuum pack asbestos paper ref Codes 36198-045 & 065.

Please determine if above can be accomplished.
