September 24, 1973

Mr. Charles Plasters
Ford Motor Company
Rouge Plant
Dearborn, MI

Dear Mr. Plasters:

Listed below are the Fiber Counts performed on the samples you submitted to us.

Sample No.	Sample Time	Fibers/cc >5μ
2	59 minutes	0.4
9	56 minutes	0.4
11	53 minutes	0.5
13	53 minutes	0.4

In your letter you noted the OSHA recommended flow rate. We assumed this to mean 2 liters/minute.

Please let us know how our results compare with others who may have read similar samples. We are most interested in comparing our results against other laboratories in order to assure greater reliability and confidence in our work. We would also like to offer our services to read more samples in the future.

If you have any further comments or questions, please feel free to contact Mr. Norris or myself at any time.

Very truly yours,

Edward J. Kleber
Customer Service Representative
