Mr. David L. Clark
Director of Product Engineering
Michael-Walters Industries, Inc.
6200 Dutchman Lane, Suite 103
Louisville, KY 40205

Dear Dave:

Per our discussion on 10/12/84, I am sending you one of the respirators we use in our asbestos mine and mill. Most of our employees use this disposable/re-usable type, which is approved for asbestos fibers. Enclosed is some NIOSH information on respiratory protection.

One thing that I failed to note during our meeting was that we have never had any indication that any of our employees, some with over 15 years experience, has suffered any adverse health effects related to asbestos exposure. Attached is a letter from the physician who has conducted our medical examinations since 1963 which corroborates this fact. This letter was submitted as evidence during my testimony at the OSHA hearings on a revised asbestos standard in July of this year.

I hope the information supplied has been helpful - contact Tom or me if you require anything more.

Very truly yours,

CALIDRIA CORPORATION

John L. Myers
Product & Production Manager
