Ref: Asbestos - Transportation and Disposal

Dear Ms. Cortez:

The cost to transport asbestos bags from Brownsville, Texas to Edinburg, Texas and unload it by hand is $21.50 per cubic yard, plus the landfill charges.

If the asbestos bags can be stored at the plant until November, 1991, we will load, transport, unload and pay for the landfill charges for a total of $32.50 per cubic yard.

The landfill where we will take the asbestos is the same landfill that the asbestos from the previous job was taken, the Harlingen Landfill, which was highly recommend by EPA.

If you have any questions regarding this quotation, please do not hesitate to contact me.

Sincerely,

INTERSALES EQUIPMENT COMPANY, INC.
