Re: Cost Estimate on the Removal of Transite Buildings
Located at the Brownsville, Texas Plant

Jose:

Attached is the information available on the transite buildings located at the Union Carbide Brownsville, Texas Plant. I have provided a description of the buildings as well as a sketch showing dimension and square footage. According to our records there are 11 transite buildings with a total of approximately 64,000 sq.ft. There are also 22 additional transite structures for example, hose hoses, substations, equipment shelters, maintenance shops, etc. The location and dimensions of the 22 additional structures are also attached.

Please furnish me a "rough" estimate on the cost to tear down, remove, dispose, and transport.

Please let me know if you should need any additional information or if you should have any questions.
