Questions: TO ASK AT I.H./MED. MEETING. GRAN

1. How should the following OSHA Requirements be satisfied while dealing with ~~direct~~ contract maintenance labor.

a. Determination and measurement of exposures, should the contractor be required to perform?

b. The law requires that engineering controls be instituted to reduce employee exposure. Under OSHA no liability. How would this relate to UCC if only the contract labor is over exposed? Under Workmen Comp we could be sued

c. The contractor could insist on work no. the way practices to reduce exposure. Should we are doing in this be included in an agreement OK as long as or contract? B+R doesn't insist

Should the contractor perform all They should but the required measurements, record keeping, We have no responsibility ~~and medical~~ information and training, to make them and medical aspects required by OSHA?

Should UCC insist that this be done? no

Do we come under any liability if B+R do not monitor their people

3. Do we liable ourselve by providing the contractor with all of their safety protective equipment? (equipment is approved)

no!

By this, do we assume a greater obligation and responsibility in relation to OSHA requirements by assuming one portion of the OSHA requirements?

no!

We provide all their tools etc.

BRF 0341

4. Should we require our contractor to perform preplacement audiograms or should we perform this service for our contractor under agreements in the contract?

(and other tests for silica etc.)

emotional problem as ucc
checks their people and BRC don't
