We are sure you are all aware that an OSHA inspection was conducted in our plant this past week. The four-day inspection of both Union Carbide and Brown & Root is now complete, the exit interview has been conducted, and the score totaled. The results are one alleged minor violation for Union Carbide and none for Brown & Root.

Obviously, management and safety staff alone cannot cause such enviable results. The true dedication of every person working in the plant is necessary, was obvious to the OSHA inspector, and was noted in the exit interview. In fact, our safety programs and their effectiveness were cited by the inspector as the best he has ever seen!

We extend our congratulations and sincere appreciation to each of you for making such a report possible.
