Subject ASBESTOS INSULATION AT FILMONT

As requested, I have made an on sight inspection of the Filmont Dump for Asbestos Insulation, which was discovered by the State E.P.A. Department. We found and removed (4) four bags of insulation which consisted of approximately 80% KAYLO (calcium silicate) and 20% ASBESTOS. This material will be disposed of as per plant proceedures.

I estimate by the condition of the plastic bags and the Insulation that it has been at this location for (5) years.

The plant Maintenance Department is commited to the proper and safe removal of all asbestos containing materials. Feel assured that we will take immediate actions on any problems that you may have in the future.
