UC-2334

ASBESTOS HANDLING 8/21/85

Plant Engineering - x 2574 Mary Watkins

Had no specific info. suggested I call Goran Gasket.

Goran Gasket Co. - 725-2136 Joe Bowman
Kanawha City

They use no special handling procedure while cutting asbestos gasket material. They do keep their work area clean to avoid accumulation of debris. They use dust mask while handling asbestos fabric because it does have loose fibers. Suggested I call the customer service rep. for John Manville.

John Manville 1-800-233-2900
Manville, N.J. Bill Hall X-2462

They have no special procedures. The amount of binder in compressed gasket material holds the asbestos with particles the size of cuttings. In their recommendation gloves and dust mask are sufficient protective equip. Someone involved with extensive handling may use coveralls. Bill is sending me some of their brochures.

General Engineering 768-4964
MacCorkle Ave. Warren Mathews

No special handling procedures. They have been OSHA inspected with no citations.

Nobel Rubber 744-4658
7th Ave. S.C. Garratt McDonald

No special handling procedure while cutting asbestos gasket material. He has had OSHA inspection with no citations. He put his work out on contract service.

UCC 003205

ASBESTOS HANDLING 10/10/85

B. Stump, Dick Hurais, Debbie , Smitty, Bill Young, Walter Kybert Lessard.

- Bill Young – smoke air flow at gasket table.
- Debbie – Plant wide effort to survey rooms and bldg ventilation.
- Present System – Not adequate to control asbestos fiber dust - will fix system. Limited to clean ups.
