PLAINTIFF'S EXHIBIT

UC-2387

UNION CARBIDE

Mr. F. H. Larrison
King City

February 7, 1975

Mr. J. L. Myers

As I understand it, our present plans are to package the SG-103 for Kentile in 50 lb. Valeron cross-layered plastic bags. In examining the normal cost associated with this product, it is obvious that this packaging approach is very costly. Assuming that we get the recalcitrant pellet cooler into effective operation, would it be possible to use a monolayer polyethylene bag of 100 lb. capacity and enjoy a significant cost saving?

W. C. Thurber
