SUBJECT: Asbestos Usage

Bob:

We are proceeding to establish plans to implement the phase-out of asbestos-containing materials from C&P facilities. I have asked Clyde Neely to lead this effort which will require resources and input from Maintenance groups, Purchasing, Safety and Health as well as Engineering Technology skill centers. Clyde will, in the next couple of weeks, develop a plan outlining the general steps required for this program between now and January 1989. We'll keep you posted on progress.

Very truly yours,

Joe
