Bill:

Attached find the Oct. air sample results. This is the set I told you we were re-checking. These answers are approx. ½ of the original results. The lab. tech. who did the counting counted everything on the slide the 1st time.

I have also sent a comparison of Kleber's answers on the same samples. Kleber is considerably lower than we are. He is forwarding the samples to McDaniel for his check.

I have talked to McDaniel and it is his opinion that the samples are no good after about 1 wk. which could explain Kleber's variance from us. In the future I plan to send our samples to McDaniel for checking - this was his request.

Dallison
