COMMENTS

Insulators monitored while working together to strip approximately 35 feet of old insulation from a water line just outside of Cell 11 on first level of Building 707. While stripping the insulation, both workers wore disposable suits and respirators. A water spray was used to keep the dust down, the area was barricaded, and plastic was spread on the ground to catch falling debris. Exposure levels were found to be well below the allowable exposure limit. Please notify employees of exposure results.
