Dear Mr. McDaniel:

Enclosed are the most recent water investigations covering the month of June. Also, a dust count was performed on July 2, and a report of findings is also enclosed.

Very truly yours,

Donald S. Kamens

REPORT OF DUST PARTICLE ANALYSIS

Dust count samples were taken on July 2, 1968. It should be noted that the bagging area is enclosed and all personnel are required to wear respirators when working in this area. Also an additional dust raising source was caused by maintenance personnel removing a room in the southeast portion of the area. Improvement should be noticed on subsequent investigations as a new dust collection system is to be installed during the latter part of the month while the plant is shut down for vacation.

Weather: Fair, 85° with winds 10-20 miles per hour from the north. Standard grade pellets were being packaged.

SAMPLE		M.P.P.C.F.
Maintenance Bldg.	Routine work being performed	2.9
Office	"	1.8
Lab	"	3.7
Offices above Maint. Shop	"	1.8
Rock Fiber Area	Normal Operation	2.0
Same as Above	"	2.3
