Subject Asbestos - Stripping Old Insulation

PROJECT

Survey for asbestos exposure of insulators stripping insulation from high pressure steam lines in the south side basement of Building 701.

DATE OF SURVEY

September 9, 1978

SUMMARY AND CONCLUSION

Good judgement and proper housekeeping techniques by insulators kept the exposure to asbestos fibers at a minimum. The job was wet down with a garden sprayer and dismantled with the minimum amount of cutting. Mr. R. Raines and Mr. E. Davis were wearing 3M disposable dust masks. The stripped material was bagged and labelled for landfill.

The exposures were well below the TWA of 2 fibers/cc and a ceiling value of 10 fibers/cc.

RESULTS

Location	Personnel	Sampling Time-Min.	Exposure Fibers/cc > 5 μm.
Building 701-B	R. Raines	15/2 LPM	0.11
Building 701-B	E. Davis	20/2 LPM	0.17

UCC 024375
