February Production and
Shipping Schedules

Attached are the various schedules for production and for shipping of the major orders for February.

The seven bulk cars of SG-104 should be scheduled to maximize plant output. Even though the schedule shows a modest 2329 tons, we can obviously use more of almost everything if you can make it. If you should "over-produce" for the month, it would be great.

We have received several very good reports from customers on the excellent condition of arriving rail cars. Ruco, Kansas City was particularly glowing and said that their last car of SG-210 was the "best car of anything" they had ever received. Please thank Abbey and the shipping crew for all of us.

R. E. Byrne, Jr.
