File

8 x 90 = 720 Tons
5 cars three 1-20

Attached are copies of production and shipping schedules of major order for the month.

Eight bulk cars of SG-104 are included and should be scheduled to maximize plant output. Once again, 60 tons of T-135-0 are scheduled in the last week and we will postpone them if possible.

Although our backlog has dropped dramatically, we still need every pound of product we can get for January. As you know, the backlog consists of orders we could sell if we had product.

The critical shortage of RG-244 and SX-24 which meets specification also requires the maximum production of those products. Since they are both in such short supply, we suggest producing each for two or three days at a time.

RG-244 inc. 36 Tons
