Subject Airborne Asbestos Fiber Counts

Enclosed are the results of our fiber counting in Building 166, Labs 112, 116-118 and 158.

I have also enclosed a one page summary of the OSHA Regulations regarding asbestos. The results of the tests appear to be quite low and well within the OSHA limits. This is due, no doubt, to the small amounts of asbestos used in laboratory work.

We intend to continue monitoring and will endeavor to eventually have fiber counts on all types of laboratory functions where asbestos is used.

If you have any questions please do not hesitate to contact me.

E. J. Kleber
