Subject Dust Counts

On July 21st Paul McDaniel, UCC Medical Department, ran dust counts in 2 of our labs. The results are as follows:

Lab 118: a) Personal sample: Operator wearing sampler during dry bulk density test, probably his dustiest operation. 0.28 fibers/ml, asbestos count, 0.74 mmppcf total dust.

b) Background sample: Sampler left to run in lab for approximately one hour with no one present. 0.04 fibers/ml asbestos, 0.25 mmppcf total dust.

Lab 158: Personal sample: Operator wearing sampler during "typical" weighing and mixing operation. 0.13 fibers/ml asbestos, 0.8 mmppcf total dust.
