WV-0236 #43 May 9, 1983

Cash,

In response to a request from Gerald Burns, I have obtained some of these work masks for trial by the insulators. The advantage of these filters is the exhalation valve, which makes breathing less laborious. They are approved for protection against asbestos. We presently stock the equivalent filter without the exhalation valve. These filters cost $2.62 each, while they cost $1.50 without the exhalation valve.

If you want to purchase, they meet with our approval.

Wayne

P.S. The insulators haven't seen these yet and Gerald has been on me for a while. Can you get these to the insulators ASAP?

Thanks
