Re: Mining and Metals - OSHA Standard on Certain Carcinogens - Asbestos - Boise Cascade

Dear Mr. Myers:

Pursuant to our telephone conversations, our reply to Boise Cascade's letter of inquiry should be limited to the carcinogen matter. As Boise Cascade does not use our asbestos in their food packaging products, there is no need to get involved in a discussion as to the FDA position on the use of asbestos in food packaging.

Very truly yours,

Robert F. X. Fusaro
