DISPOSAL BAGS

- Simplify labeling of asbestos products and asbestos waste materials.
- No tags to come off.
- No labels to come unglued.
- OSHA and EPA specified wording printed directly on bag.
- Label continuously and conspicously displayed.
- Black lettering on a yellow background.
- Available in three sizes.
- Available in two thicknesses.
- Ideal for waste such as stripped insulation, scraps, soiled coveralls, etc.
- Twist ties provided.

Strong durable polyethylene bags are available in two hand held sizes of 30" x 48" and 30" x 37" and in a 55 gallon drum liner size of 24" x 14" x 65" in 0.004 inch thickness. These bags were conceived as a workable solution to labeling asbestos waste according to OSHA 1910.1001 (formerly .93a) and also aid in compliance with EPA Emmission Standards 61.22. Special sizes and thicknesses quoted on request.

RESPIRATOR STORAGE BAGS

- A specialty line of polyethylene bags ideal for protecting cleaned and sanitized respirators.
- Store respirators in sealed bags.
- Handy "write on" labels allow you to note special information directly on bags.
- Available in two convenient sizes to fit any respirator.
- Strong "Hi-impac" polyethylene, 0.0002 inches thick.
- Recognize special use respirators at a glance.
- Costs only slightly more than plain bags (also available).
- Choice of colors and company emblem available with quantity purchases.
- Twist ties provided.

Durable "Hi-impac" extra duty bags come in two sizes, 8" x 6" x 20" and 6" x 4" x 15" for any size respirator. The label is printed with a special ink which may be written on with ink, ball point pen, felt tip marker or pencil. Bags are also available plain without labels.
