SUBJECT Industrial Hygiene Monitoring of Contract Personnel to Meet OSHA Standards

Ref: Letter by J. L. Rosenberger to W. D. Weber "Rough" Drafts of Asbestos and Benzene Procedures for Construction - Texas City dated July 1, 1977

RECEIVED

Dan:

This is to request:

(1) Your transmittal of reference above with drafts to the HEA Business Team for consideration/comment/approval.

(2) Your guidance and direction to insure that Texas City is consistent with corporate and C&P intent/policy relative to monitoring of contract personnel when required by OSHA health standards.

During the interim period, Texas City will:

(1) Follow the draft procedures developed by Mr. Rosenberger.

(2) The Texas City HEA Department will provide Industrial Hygiene services to the contract divisions upon request, as available resources permit.

(3) When resources are limited, priority will be given to plant (UCC) employees.

Dan, I feel this is the most economic and practical way for this plant to approach this problem. However, I'm sure that at times existing I. H. resources won't be able to handle the contract as well as regular plant demand.

Thanks for your help. Please contact if questions.
