To. R. F. Hunt – Bldg 770

Ceramospray is composed of mineral wool and ceramic fibers and is asbestos free. However its use is normally restricted to large surfaces, such as ductwork, breechings, large equipment, that may be spray-applied. Special spray equipment must be rented for its application.

The only major piping insulation materials which contain asbestos are the "calcium silicates such as Owens-Corning "Kaylo 10 + "Kaylo 20" and Johns Manville "Thermobestos". Asbestos-free substitutes for calcium silicate may be one of the following:

Up to 1500 F – "Careytemp" as mfg by Philip Carey Corp.
50 F to 250 F – Preformed urethane with PVC or aluminum jacket as mfg by Insulation Shapes
50 F to 400 F – Fiberglas as mfg by O-C, J-M, or CS&.
Up to 1200 F – Mineral wool such as MF Pipe Insulation as mfg by 48 Insulation Inc or Alumi-fy-Felt as mfg by Eagle-Picher
50 F to 200 F – "Armaflex" as mfg by Armstrong or O-C Flexible Tubing as mfg by Owens-Corning

The selection of either of the above materials depends
