Subject King City Value Engineering

As you have been advised or as I have discussed with you, a "Value Engineering Team" has been organized comprised of the addressees and the writer to examine the possibilities of increasing the production from the King City plant. The team will meet in King City at 8:00 A.M. on February 12, 1974, in a room to be arranged for by Larry Larrison. The team should plan on spending the entire week at King City. By this letter I am requesting Larry Larrison to make motel reservations at the "Sage Motel" starting the night of February 11 for the travelling participants.

Mr. W. Thurber will meet with the team for the first hour or so on February 12, 1974, to define the goal of the team. If any member of the team cannot make the meeting or has any questions, please contact the writer.

Very truly yours,

D. G. Millenbruch
