Subject: Removal of Insulation in 77L

Walt,

In my opinion the insulation removal was handled poorly and Allied should not do this work in the future.

STATUS:
The insulation has been removed and bagged.

MY OBSERVATIONS:

- The only plastic covering in place was installed by MPT personnel. In fact, one cover was removed.
- The door to the upper level of 75L was partially open.
- There were no warning signs posted on the entrances to the lab.
- It appears that MPT's vacuum was used (dry) to clean up. Allied disposed of the filter.
- There is still particulate matter on the shelves that were not covered and on the floor.
- The air samplers are turned off (unless they are on timers).
