PLAINTIFF'S EXHIBIT

UC-3398

Friday
May 28, 1982 meeting Dr. Anastas Office
Main Points of Anastas Conversation

1. Latency period 10-30 years therefore not necessary.
2. 2 years is adequate because of high levels of radiation that the employee would be exposed to over 2 years
3. Anyone regardless of craft that he feels has a problem he start examinery every year anyway. (If one multi-phasic he determined someone may have signs of asbestosis he adds to annual list for a medical exam.)
